Avg Lead Time Days

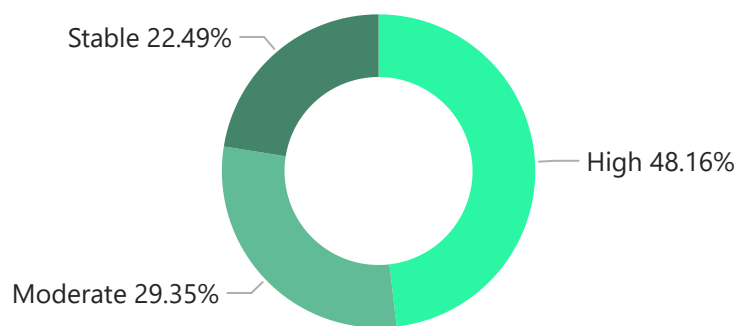

Timeline of Global Supply Chain Disruptions

Monthly Volume of Delays and Bottlenecks: January 2024 – December 2025

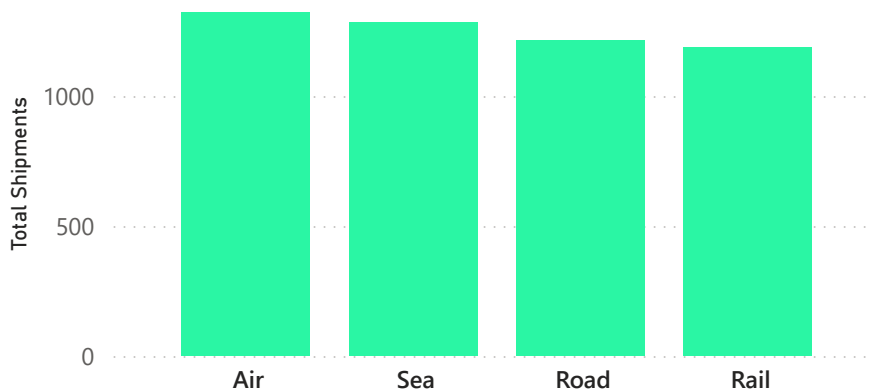

Distribution of Disruptions by Risk Severity

Proportional Analysis of Total Incidents by Assigned Risk Score

Shipments by Transport Mode

Breakdown of Logistics Volume by Primary Transport Category

Transport and Logistic Performance

Tracking shipment performance, delays, and operational bottlenecks

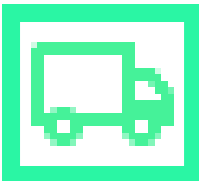

Air

Most Impacted Transport Mode

398.03

Km per Day

Transport Mode Performance Summary

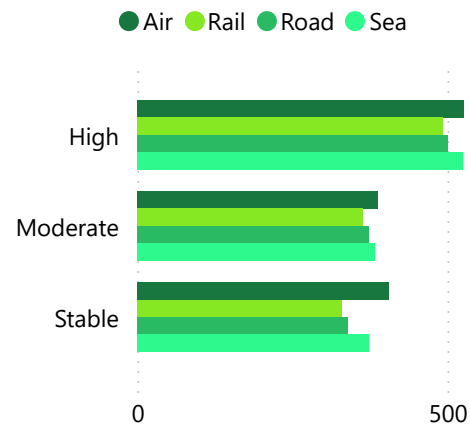

Transport Mode	KM per Day	Total Shipments	Total Disruption Occurred	Average Risk Score
Air	4,721.85	1320	815	4.99
Rail	391.40	1185	725	5.17
Road	461.52	1214	741	5.10
Sea	192.18	1281	782	5.07
Total	398.03	5000	3063	5.08

Average Lead Time Days by Destination Port

Comparing delivery times across ports.

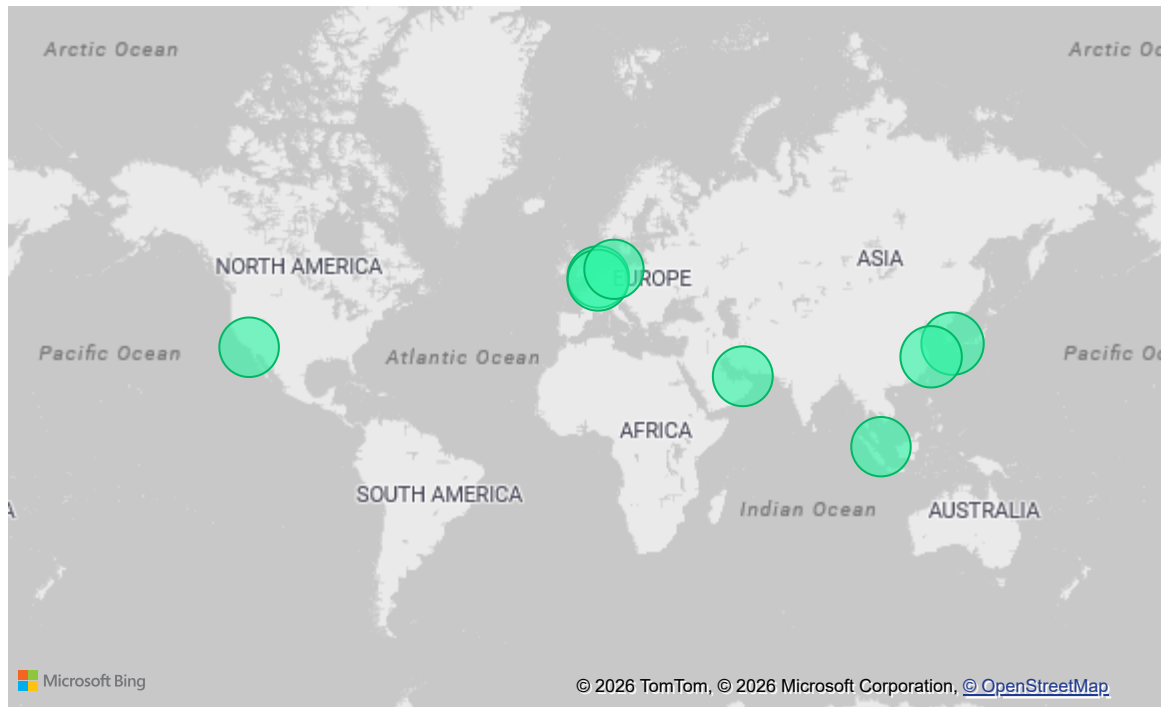

Shipment Breakdown by Risk and Transport Mode

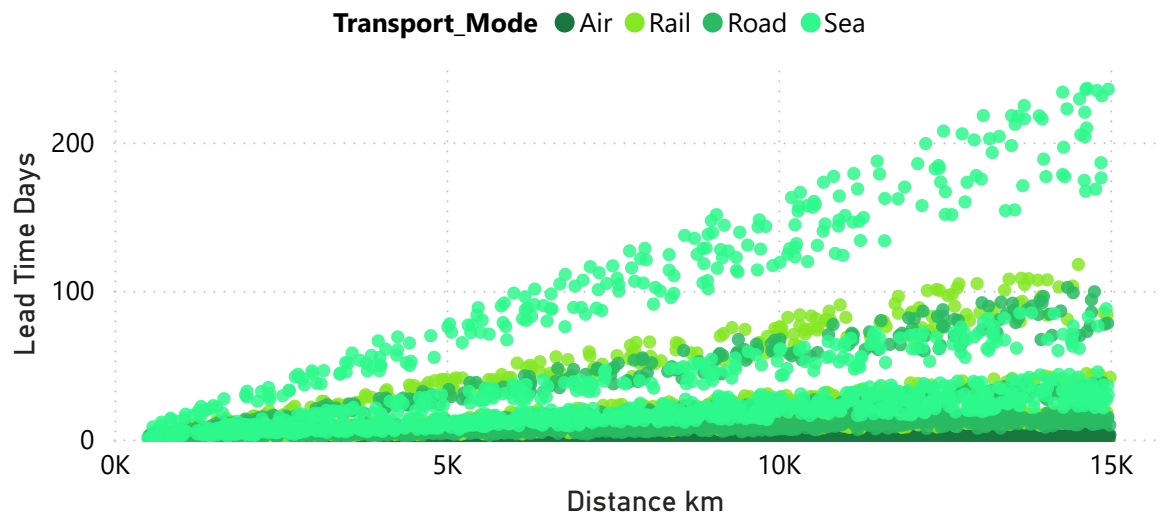

Shipments by Origin Port

Geographic Distribution of Export Volume by Port of Origin

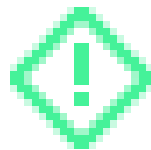

Logistics Performance: Distance vs Lead Time

Exploring delivery efficiency and variability across different shipment distances.

Risk Analysis

Analyzing risk levels and their impact on supply chain disruptions.

39.85%

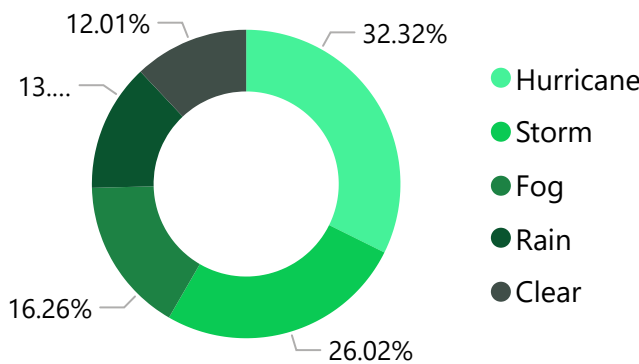

% of High risk shipments

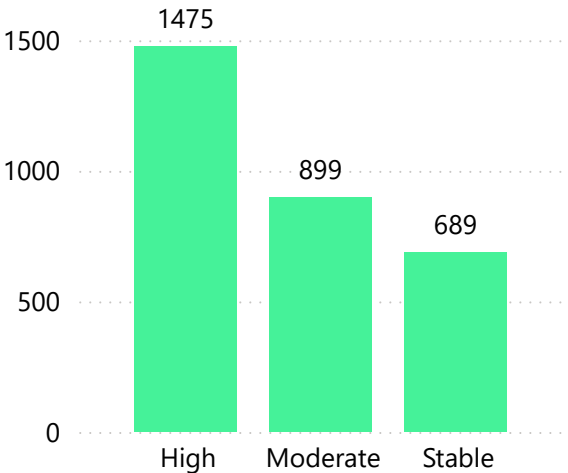

Textiles

Most Disrupted Product Category

Disruption Occurred by Weather Condition

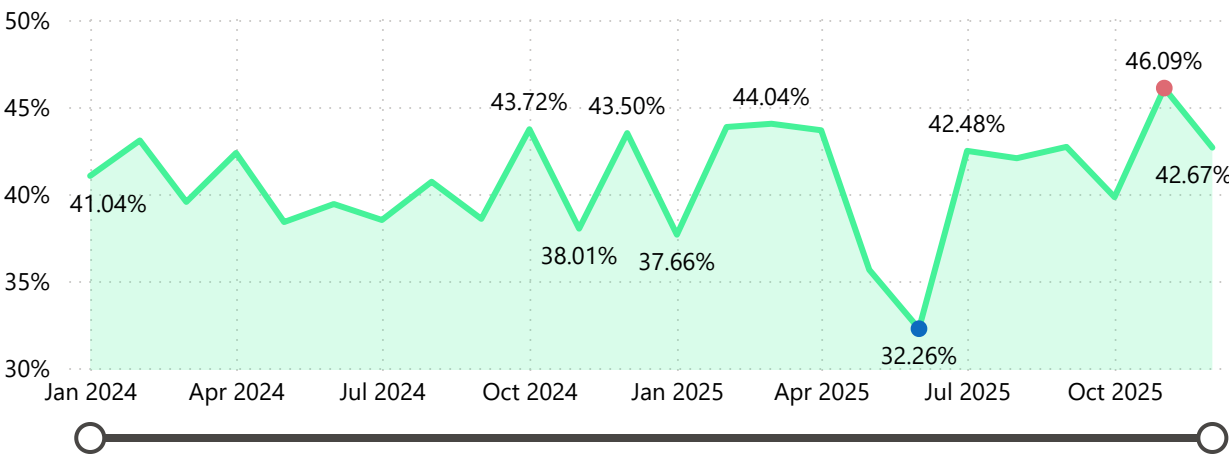

Disruptions Occurred by Risk Score

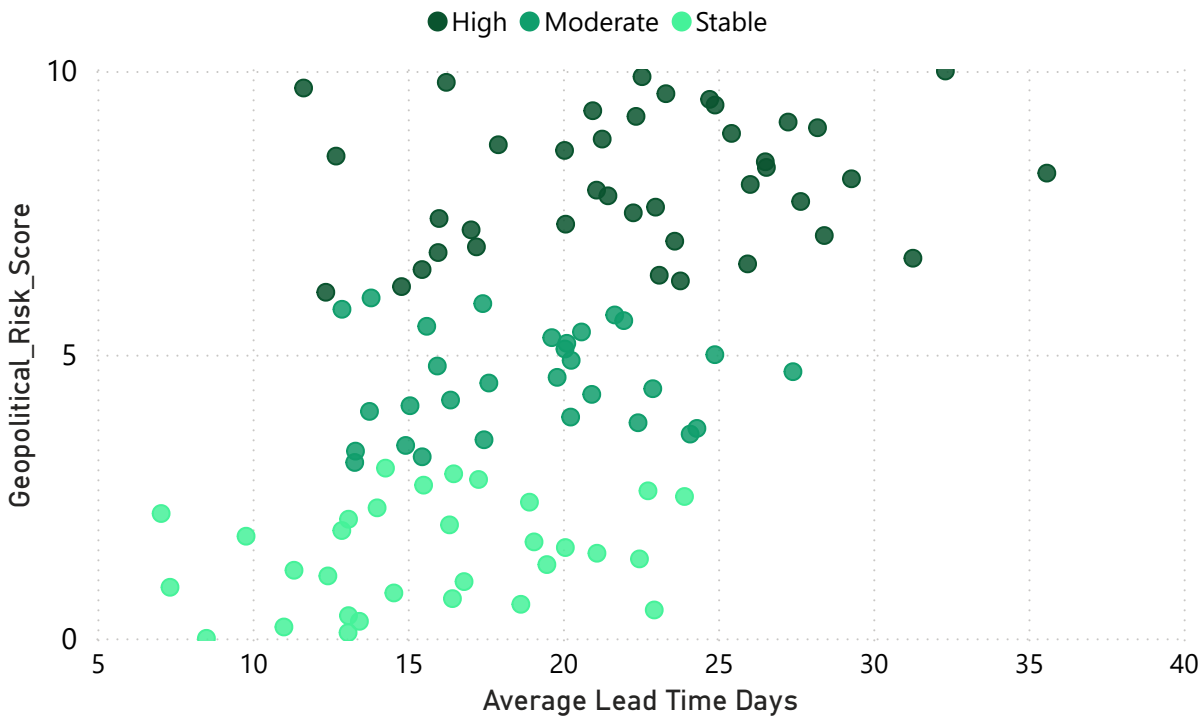

High-Risk Shipment Trend Over Time

Tracking the proportion of high-risk shipments over time.

Geopolitical Risk vs Delivery Lead Time

Analyzing how geopolitical risk affects delivery time.

High Risk Routes by Total Disruption

Identifying critical routes with frequent disruptions.
